The ETRA Ph.D. Cohort in Instructional Technology prepares students for positions of leadership in teaching and research and the development of new knowledge and applications in instructional design and technology. Students may explore issues and advances in performance, instructional design, and computer-based and distance-learning environments. Graduates are prepared for technology leadership roles in diverse settings including all levels of education, industry, government, and not-for-profit agencies.

The 2015 cohort is limited to ETRA MSEd -IT/TS graduates

This Ph.D. cohort is specially designed for ETRA M.S.Ed. graduates to prepare for the integration of theory and skills as the base for original research. Students meet as a cohort, progressing through the program together. Each semester students take two to three courses on Monday evenings, with 1-2 face-to-face meetings at NIU campus sites and online synchronous and asynchronous meetings.
